

Labels Work Better When We Work Together

Sheet metal workers look out for themselves and each other by using the union labels. Labeling, scanning, and reporting protects union jobs, wages, and benefits.

The labels show contractors are abiding by union contracts. Labels make it easier for contractors to comply with key contract provisions. The SMART Labels can also help protect contractors from competitors seeking to undercut wages.

When labor and management work together we get better results and stronger protections.

**LABELS SERVE WORKERS
AND CONTRACTORS**
